

So, where you are you coming from?

Notes about the location information in HO 334

Data

Home Office: Immigration and Nationality Department: Duplicate Certificates of Naturalisation, Declarations of British Nationality, and Declarations of Alienage

HO 334

Refine

• Where on the map are people coming from when they speak of "Prussia" in ho334?

It depends who you ask

http://unlock.edina.ac.uk/ws/search?name=Prussia United States, West Prussia, East Prussia, King of Prussia, Prussia, Township of Prussia, Prussia Cove, New Prussia, Prussia Run, Best Western The Inn At King Of Prussia, Homestead Phl-King Of Prussia, Hampton Inn Philadelphia/King of Prussia, King of Prussia Business Center, King of Prussia Business and Industrial Center, King of Prussia Chamber of Commerce, King of Prussia Church of Christ, King of Prussia Library, King of Prussia Station 47-A Fire Station.

An image of bombed out children sit in the street can found here. Photograph from the Ministry of information.

A good morning from the hack the record in London, I am looking at the moment into the record of the "Home Office: Immigration and Nationality Department Dyplicate Cardicates of Naturalization, Declarations of British Nationality, and Declarations of Alvanage".

What the record contains is an official mark in the life's of the siblings Emil, Hanna, Hermann and Sofie Goldschmidt who arrived from Hannburg to live with their dad Adolph in London. Did they free because they are Jewish? Are they school kids (the record entry list them here close together so Lassume that makes them to younger children) or are they abuts who have relatives sheady in Dritain. This children are noted here, just a few month before the title in London. Did they survive this air strike in their new home? Did they look out for a new shelter afterwards? Are they reunited with their mum who might be Eas? A character 65 years away and very capable to call my first idea (lefs draw their location on a open street map) premature. She brings a new value of undefined space to the table and therefore should be represented accordingly.

It seems to me that as soon an I get hold of one of the records, it slips through your finger again. It heels thustrating and exciting at the same time. This records entry are actaily just isolated data points not history. I understand now Jo a bit better, when he speaks of a history as an act of craffing from data.

To do: presenting the data in the context

- Reduce the dataset to place names https:// github.com/HennyN/National-Archives-hack-the-record-2012--HO-334
- Search for context in Geoparser Unlock <u>http://unlock.edina.ac.uk/ws/search?</u>
 <u>name=Prussia</u>
- Present data in new context

:Big thx to
